	1 Preparation and performance of desiccant coating with modified ion exchange resin on finned tube heat exchanger. Appied Thermal Eenineering, 2016, 93:36-42 2 Preparation and Characterization of Hygroscopic CMC Graft Copolymer/Silica Gel Composite Adsorbent. Journal of Chemical Engineering of Japan, 2016, 49(7):1-8 3 Silica gel adsorbents doped with Al, Ti, and Co ions improved adsorption capacity, thermal stability and aging resistance. Renew Energy, 2014, 63:755-61 4 Ultrasonic synthesis and characterization of polystyrene/n-dotriacontane composite nanoencapsulated phase change material for thermal energy storage. Applied Energy, 2014, 132:551-56 5 Study on polyethyleneglycol/epoxy resin composite as a form-stable phase change material Energy Convers. Manage. 2010, 51(12):2757-61 (6) Preparation and thermal performance of Polystyrene /tetradecane composite nanoencapsulated cold energy storage phase change materials Energy Convers. Manage. 2013, 76:430-6 (7) Characterization and performance of novel modified silica gel/molecular sieve composite International Journal of Low-Carbon Technologies, 2012, 7:271-4 (8) Preparation of nanoencapsulated phase change material as latent functionally thermal fluid. J. Phys. D-Appl. Phys., 2009, 42 (3):035407, 7 (9) Preparation and characterization of novel nanoencapsulated phase change material Energy Convers. Manage. 2010, 49(12):3704-07
